Churachandpur

2. Dr. K. Khelchandra Singh

Head, Department of Environmental Science,
Pachhunga University College, Mizoram

3. Dr. Maibam Romeo Singh

Assistant Professor, Nagaland University

About the Seminar

The region of North East India comes under the Indo-Burma biodiversity hotspot and it is home to various forms of endemic plant and animal species. Since the past few decades, the biodiversity of this region comes under serious threats, majority of which are man-made. Although efforts are being made to protect many endangered species living in this area, nevertheless it has always been a big challenge to the conservationists. Some of the issues can be highlighted as traditional practices of hunting, agriculture etc. of the various tribes living in the area and issues related to urbanization, industrialisation, construction of roadways, railways, dams, etc.

Abstract Submission

Participants are requested to send their abstract in MS Word, 12-point font with 1.5 line space. Title words should be capitalized and bold. The text of abstract should not exceed 250 words with 4 to 5 key words only. The participants must bring the soft copy of full paper(s) on the day of seminar. Abstracts can be submitted to the Convenor of the seminar in the Email id: tilakigc2016@gmail.com on or before the 19th June, 2022.
